Waste Utilization Plants for Household and Commercial Waste Renewable –Bio – Energy

We Denberg Holdings Ltd represents PSE Engineering and TES Technology and Engineering one of the biggest organizations who is dealing with the Renewable Energy.

Using its patented plasma gasification and nitrifications (SPGV) technology, power is produced by the gasification of waste streams, such as Biomass, Urban or industrial and hospital waste, and tires. In addition in a non-renewable mode, the SPGV reactor can cleanly and safely use coal and coal and oil wastes as feedstock. The SPGV technology complies with all the requirements of the EU Working Program: “Energy, Environment and Sustainable Development” and with the Kyoto objectives, as well as the EU White Book “Energies for the Future”.

Water Treatment (Manufactured Brackish & Sea Water Reverse Osmosis Systems)

2. PSE Engineering and TES Technology and Engineering

Is a world leader in the renewable energy sector. The company invests in the development and management of sustainable infrastructures, services and renewable energies, including small hydro, biomass, solar and thermal energy, and the marketing of bio fuels. It also has assets in the field of co-generation and wind turbine manufacture. It is currently carrying out research projects to produce hydrogen from wind power and to manufacture more efficient photovoltaic cells.

PSE Engineering and TES Technology and Engineering Energy is a world leader in renewable energies with almost 5,500 MW in service and a strong presence in eight technologies. It has installed almost 5,300 MW of wind power capacity in 192 wind parks in 12 countries, of which 3,824 MW are owned by the company.

Water Treatment (Manufactured Brackish & Sea Water Reverse Osmosis Systems)

Developing

We are one of the most experience development company based in Cyprus, Greece, Bulgaria and UK. Today the nationwide company is still privately owned and managed, ensuring our company priorities remain client oriented. In recent years, we have expanded via steady organic growth creating partner offices in four countries.

Our company remains at the forefront of the property industry, dealing with all aspects of property development. The company offers a wide range of quality freehold homes for sale, with all modern comforts and conveniences. We have properties on the market at any given time, from spacious apartments and modern houses, to exclusive custom-designed villas.

The quality of our company finished product is unparalleled. They not only build homes of outstanding architectural design, but are also dedicated to creating superior living environments.

Developing Continued

Key considerations the cornerstone of each and every home of our company.

1. Offering a varied product
2. Delivering quality homes of unique designs
3. Providing homeowners with a rewarding investment
4. Continually improving the service to their clients

Our promises are to continually provide the very best quality homes and services at value for money prices. Always putting the client first, they will find the right property for each and every one and will guide them step-by-step throughout the entire Denberg journey.

Consulting

At Denberg Consulting, we transform the performance of organizations

We put together teams from many disciplines and backgrounds to tackle the most complex problems facing our clients, working with leaders and their staff to turn around organizations in the private and public sectors. Clients call on us when they want:

- ▶ an innovative solution: counter-intuitive thinking and groundbreaking solutions
- ▶ a highly responsive approach: we listen, and then we act decisively and quickly
- ▶ delivery of hard results: we get the job done, often trouble-shooting where previous initiatives have failed.

We are an independent, employee-owned, (global firm) operating from offices with partner worldwide.

We have won numerous awards for delivering complex and highly innovative assignments, run one of the most successful venture programmers in our industry, have technology development capability that few firms can match, deep expertise across key industries and government, and a unique breadth of skills from strategy to IT to HR to applied technology.
